SUMMARY

Frappe / ERPNext backend engineer with 7 years of Python experience building enterprise platforms — multi-tenant Frappe hosting, payment-gateway and biometric-hardware integrations, and government attendance systems serving ~1 lakh employees. Hands-on in manual testing, penetration testing (VAPT), and application security, with a focus on shipping secure, well-tested releases. Featured speaker on the official Frappe Built Talks series. Currently leading a team of 10 engineers at caratRED Technologies.

PROFESSIONAL EXPERIENCE

Team Lead · caratRED Technologies

July 2024 – Present · 2 yrs 3 mos

- Delivered **10+ live enterprise applications** on Frappe / ERPNext end-to-end, including HRMS, Helpdesk, ezyForms, and Timesheet platforms.
- Designed and implemented scalable REST APIs using FastAPI, integrating third-party payment gateways and external services.
- Established CI/CD workflows, Docker-based containerized deployments, and production support protocols.
- Lead a **team of 10 engineers** across ERPNext, Frappe, Python, and Vue.js projects, owning architecture, code quality, and sprint delivery.
- Mentored junior developers, ran code reviews, and defined the team's technical standards.
- Introduced AI-assisted development (Claude Code, Cursor, GitHub Copilot) into team workflows for feature delivery, code review, and debugging.
- Own **QA and security sign-off** for releases: manual functional, regression, and UAT testing, plus penetration testing of Frappe apps and APIs against the OWASP Top 10 before production.

Software Engineer · RNIT Software & Solutions

November 2019 – July 2024 · 4 yrs 9 mos

- Built and customized **ERPNext modules** across HR, CRM, Accounts, Buying & Selling for diverse enterprise clients.
- Integrated biometric attendance hardware with ERPNext, eliminating manual punch-in processes.
- Developed facial recognition attendance and monitoring systems (Python, Angular) deployed for the Telangana and Andhra Pradesh state governments.
- Managed AWS EC2 deployments, Docker containerization, server hardening, and REST API integrations with third-party platforms.
- Performed **manual testing** (functional, integration, regression) of ERPNext modules and REST APIs; wrote test cases and tracked defects through to closure.
- Served as primary technical contact for client communications, bug resolution, and feature planning.

MAJOR PROJECTS

Internal Frappe Cloud Setup

Architected and deployed an in-house Frappe Cloud equivalent — multi-tenant site provisioning, automated bench management, backup scheduling, and one-click app installations for internal teams.

Frappe · Bench · Docker · Linux · AWS

ezyHR

Full-featured HR platform on ERPNext & Frappe — attendance automation, payroll engine, leave workflows, and employee self-service portal.

ERPNext · Frappe · Python

Govt. Facial Recognition Systems
Real-time employee attendance & monitoring systems for Telangana and Andhra Pradesh government departments, serving ~1 lakh employees.
Angular · Python · AWS

Guest Room Booking
End-to-end booking system in Frappe v14 with dynamic web forms, Razorpay & Paytm payment gateway integration, and admin dashboards.
Frappe · Razorpay · Paytm

ezyForms
Dynamic form-builder and data-collection platform with custom workflows, approval chains, and integration with ERPNext backends.
Frappe · Vue.js · FastAPI

Partial Data Backup from UI — Frappe
UI-driven partial data backup feature in Frappe that lets users selectively export DocType data without full-site dumps. Built with Claude Code (AI-assisted development), taking it from concept to production.
Frappe · Python · Claude Code

TECHNICAL SKILLS

Frappe / ERPNext: Frappe Framework · ERPNext · Bench · DocTypes · Workflows · Print Formats · REST / Whitelisted APIs
Backend: Python · FastAPI · MariaDB / MySQL · Redis
Frontend: Vue.js · Angular · TypeScript
DevOps: Docker · AWS EC2 · Linux · CI/CD · Git
AI Tooling: Claude Code · Cursor · GitHub Copilot · N8N
Testing & QA: Manual Testing · Functional / Regression / UAT · Test Case Design · API Testing (Postman) · Bug Tracking
Security: Penetration Testing / VAPT · OWASP Top 10 · Burp Suite · OWASP ZAP · Nmap · Server Hardening · Secure Coding

KEY ACHIEVEMENTS

- **Featured by the Frappe Team** in the official "Frappe Built Talks" series on YouTube, sharing real-world builds and ERPNext implementation insights (watch the talk).
- **10+ live enterprise projects** delivered end-to-end across HRMS, Education, Government, and Finance domains.
- Designed **ERPNext customizations** across 8+ domains, cutting client onboarding time by streamlining module configuration.
- Completed **OWASP Top 10 Secure Coding** certification and introduced security review checkpoints into the team's development workflow.
- Conducted **penetration testing and vulnerability assessments** on production Frappe / ERPNext apps, fixing access-control, injection, and permission issues.
- Integrated **AI-assisted coding tools** (Claude Code, Cursor, GitHub Copilot) into team workflows, speeding up feature delivery and code review turnaround.

CERTIFICATIONS

- Managing ERPNext Custom Code via GitHub
- Secure Coding Based on OWASP Top 10
- Claude Code Beginner Crash Course

EDUCATION

B.Tech — Computer Science & Engineering (Data Science), JNTUH
DRK College of Engineering & Technology

Diploma — Electronics & Communication Engineering
GMR Institute of Technology
